About Aalto University

Aalto University has two missions: a better world and a stronger Finland. The university changes the world through top international research, multidisciplinary cooperation, pioneering education, the bold breaking of boundaries, and renewal. The unique competitive advantage of Aalto University is based on cooperation. Aalto University is where top experts of different scientific disciplines can meet and succeed.

About Design Factory

The Design Factory is a new open environment for the research and education on product development. Situated on the Otaniemi campus, the Design Factory offers modern facilities of 3 000 m² for the cooperation researchers, students and companies. The Design Factory accelerates the change in the Aalto University culture of operation and teaching by supporting interdisciplinary and problem-based learning and research.

About Tekes – the Finnish Funding Agency for Innovation

Tekes is the most important publicly funded expert organisation for financing research, development and innovation in Finland. We boost wide-ranging innovation activities in research communities, industry and service sectors. Tekes promotes a broad-based view on innovation: besides funding technological breakthroughs, Tekes emphasises the significance of service-related, design, business, and social innovations. Tekes works with the top innovative companies and research units in Finland.
